

# QUERIED PERFORMANCES

The following excerpts, taken from the official RWWA Stewards' Reports, include details of all recent queried performances by greyhounds racing in Western Australia.

VENUE	DAY & DATE	RACE	DETAILS
Cannington	16/02/2019	5	Stewards spoke to Mr James Jeffries in relation to the performance of <b>QUARA'S EMMA</b> from Race 5 after she led and faded to run fourth in a time of 30.62. Mr Jeffries explained that <b>QUARA'S EMMA</b> missed a run after it was a late scratching last week. Due to the injury it sustained Mr Jeffries was not able to get much work into the greyhound. He further added that <b>QUARA'S EMMA</b> would go back to the Mandurah track. No further action was taken.
Cannington	15/12/2018	4	Stewards questioned the performance of <b>WEST ON AUGIE</b> following its 30.34 second run when it lead and faded to finish fifth. The greyhound was subsequently examined by the OTV and found to have a right foreleg long head triceps muscle injury (monkey) and a right hindleg biceps femoris muscle injury (thigh), resulting in a 14 day stand down period. As a result, given the extent of the injury and stand down period, no further action was required. Connections have been requested by the Stewards to report any further injuries which were not detected on the race night.
Mandurah	16/10/2018	1	Stewards queried the improved performance of <b>VILLAFLY</b> that won its Maiden Race over 405M in a time of 23.29. Trainer Mr P Worthington explained that he has only been training the greyhound for its previous three starts and added that <b>VILLAFLY</b> is normally raced over the longer distance of 490M. Tonight with a vacant box next to <b>VILLAFLY</b> and an uninterrupted run through the first turn, the greyhound was expected to finish strongly. A urine sample was taken for analysis.
Mandurah	14/09/2018	4	The Stewards inquired into the performance of the greyhound <b>SIN CITY BOY</b> in Race 3 at Mandurah on 14/9/2018. The greyhound was vetted post race and was diagnosed with a sore left hind Gracilis injury and stood down for 7 days. Stewards spoke with the Trainer Mr. J. Righetti who advised that he believes the greyhound had not backed up well after running at Northam on Monday, and combined with the greyhound's age and a change in training techniques, he believes this had left the greyhound 'flat'. Mr. Righetti advised he has noticed the greyhound hasn't been his usual self over the last six weeks but was still happy with the run considering the strength of the field. Mr. Righetti advised he did have an investment on the greyhound. After hearing all the evidence, the Stewards decided to place a warning on the greyhound for racing ungenerously due to an injury in the home straight.
Mandurah	11/05/2018	7	Stewards queried the performance of <b>PETUNIA MONELLI</b> from Heat 2 of the Mandurah Middle Distance Challenge over 647M. <b>PETUNIA MONELLI</b> finished last in a time of 38.28. A post race veterinary examination revealed no apparent injury. Trainer Mr D Hobby explained that <b>PETUNIA MONELLI</b> has recovered from major injuries and this was the greyhound's first start in over 5 months. The greyhound has only been trialing moderately in the build up to tonight's race. Mr Hobby will inspect the greyhound in the coming days and will make a decision with the owners regarding its racing future. A urine sample was taken for analysis.
Mandurah	22/02/2018	8	Stewards queried the improved performance of <b>INCREDIBLE BELLA</b> that won Race 8 in 22.88. Trainer M/s F. Farrell explained the greyhound had dropped a grade tonight and appears to like Box 5. M/s Farrell also explained they have made modifications to the air condition system which removes humidity which she suspects may have previously made the greyhound flat. A urine sample was taken for analysis.
Cannington	06/01/2018	5	Stewards inquired into the poor performance of <b>TEDDY MOENLLI</b> after it finished last in a time of 43.44 seconds. The greyhound was subsequently examined by the Course Veterinary Surgeon who advised <b>TEDDY MOENLLI</b> to have a left hindleg pectineus/abductor injury resulting in a 21 day stand down period. Given the serious nature of the injury no further action was taken against the greyhound other than a urine sample taken for analysis.
Cannington	11/11/2017	4	Stewards inquired into the poor performance of the greyhound <b>QUEVARA</b> , following its run of 30.99 in Race 4 tonight. Trainer M/s M. Hepple was unable to explain the poor performance. Upon a routine veterinary examination, the greyhound was found to have an elevated temperature. Stewards noted the explanation and no further action was taken. A urine sample was taken for analysis.
Mandurah	17/08/2017	9	Stewards queried the Trainer of <b>SIMPLY READY</b> Mr. D. Coldstream regarding the performance of the greyhound which tailed off due to injury soon after the start. A post race Veterinary examination revealed a Tensor Fascia injury to the left hindleg and a stand down time of 28 days. Mr. Coldstream explained <b>SIMPLY READY</b> was thoroughly examined this morning and pulled up fit and well from racing on Tuesday night. Mr. Coldstream had deliberately increased the frequency of races for <b>SIMPLY READY</b> as the greyhound had thrived previously on a heavier workload. Mr. Coldstream will rehabilitate the greyhound in an effort to return to racing in the coming months. Stewards were satisfied with this explanation.
Cannington	22/07/2017	1	Stewards inquired into the performance of <b>HELLO I'M LEO</b> following its failure to race past the return gate at the conclusion of Race 1. Stewards deemed this performance unsatisfactory and unsafe and pursuant to Rule 71 <b>HELLO I'M LEO</b> must trial satisfactorily in a field trial before the Stewards, prior to being allowed to be nominated for a further event. Trainer Mr B Maclean was advised should <b>HELLO I'M LEO</b> repeat this performance, Stewards will consider recommending that the greyhound be prohibited from competing in any event pursuant to Rule 14(1)(c).
